Antimicrobial Oral Rinse

Drug Facts

Active ingredient Purpose
Stannous fluoride 0.63% concentrate anticavity, antigingivitis,
(0.12% w/v fluoride ion) antihypersensitivity, mouthrinse

Uses • aids in the prevention of dental decay
• helps prevent gingivitis • helps control plaque bacteria
• builds increasing protection against painful tooth sensitivity

Warnings
• when using this product do not use for sensitivity longer than four
weeks unless recommended by a dentist
• stop use and ask a dentist if sensitivity persists or worsens
• sensitive teeth may indicate a serious problem that may need
prompt care

Keep out of reach of children. If more than used for rinsing is
accidentally swallowed, seek medical attention or contact a Poison
Control Center immediately.

Directions

adults and children 6 years of age and older:
• do not use before mixing with water
• use once daily after brushing your teeth with a toothpaste or as directed by your dentist
• remove cap and replace with pump
• rotate spout counter clockwise to extend
• depress pump until medicine comes to the tip of the pump
• make 2 complete pump depressions into cup provided (1/8 oz)
• add tap water to line (1 oz) on cup
• mix using bristle end of toothbrush
• vigorously swish rinse between your teeth for 1 minute and then spit out
• do not swallow the rinse
• do not eat or drink for 30 minutes after rinsing
• instruct children under 12 years of age in good rinsing habits (to minimize swallowing)
• supervise children as necessary until capable of using without supervision

children under 6 years of age:
• consult a dentist or doctor

Other information

- products containing stannous fluoride may produce surface staining of the teeth
• adequate toothbrushing may prevent these stains which are not harmful and may be removed by your dentist
• see your dentist regularly
• For Professional Office Use Only
• This product is not intended for home or unsupervised consumer use.

Inactive ingredients glycerin, flavor

PerioMed™ Antimicrobial Oral Rinse Fights Gum Disease and Tooth Decay:

With research pointing to links between gum disease and overall health, good oral hygiene has never been more important.

PerioMed antimicrobial oral rinse, combined with a professional treatment program, is an important part of the overall care you need to help control:

- Gum disease
- Tooth decay
- Tooth sensitivity
- Plaque accumulation

PerioMed oral rinse provides antimicrobial activity for up to 8 hours,¹ does not contain alcohol and costs about the same as the leading over-the-counter mouthwashes.²

To achieve optimum oral health, remember to:

- Use prescribed medications as directed
- Inform your Dental Professional if you are currently taking any medications
- Brush and floss daily
- Keep your regular dental appointments
- Follow all the instructions of your Dental Professional

Your Examination Has Revealed The Following:

Key:

1. Bleeding Gums
2. Gum Recession
3. Gum Tenderness & Redness
4. Gum Pockets
5. Sensitivity
6. Oral Malodor
7. Plaque Accumulation
8. Root Planing/Scaling Co-Therapy Required
9. Periodontal Surgery Co-Therapy Required

Other:

- Oral Malodor
- Dry Mouth
- _____

Instructions:

Your Dental Professional will advise you on the appropriate course of treatment for your situation, which may include using PerioMed oral rinse.

**Available in
Mint, Cinnamon
and Tropical
Fruit Flavors!**
